NetworX™ Consulting Services

Experienced People
Proven Approaches
Technology Expertise

As the health insurance industry continues to evolve and provider contracts become more and more complex, an effective provider contracting strategy has never been more important. Equally important is the ability to efficiently model the financial impact of contracts and automate claims pricing. The TriZetto Group's NetworX Suite™ made up of NetworX Modeler™ and NetworX Pricer™ enables automation of these key processes. This automation and replication of complex pricing methodologies helps reduce the operational burden associated with manually pricing claims, maximize the value of contracts, and reduce administrative costs.

eHealthPartners' consultants are highly trained and deeply experienced with implementing the NetworX Suite™ of products. We understand the nuances of implementing the product and the integration with other products such as Facets™. Our NetworX Suite™ consulting services include:

Application Implementation Services

Our team, led by the industry's most experienced NetworX™ consultants, leverages the experience and best practices from numerous implementations to help you get the most out of your NetworX™ investment. Whether your needs involve help with developing your NetworX™ implementation strategy, product configuration, process optimization, testing, or simply upgrading to the latest version of NetworX™, we can help.

Technical & Development Services

Combining technical expertise and NetworX™ product experience, our Technical Consultants assess and make recommendations related to your applications, network, security requirements and supporting infrastructure to ensure that NetworX™ is secure and optimized for performance. Our team can also help you aggregate and normalize your provider data for enhanced decision support.

Software Upgrades and Ongoing Support

Clearly understanding the differences between your current version of NetworX™ and new versions of the product is a critical first step toward understanding how these differences will impact the way you do business. Our Gap Analysis and Project Planning services help you develop a readiness plan and understand gaps in operational process. Our experience-based recommendations assist you in leveraging new functionality to maximize this opportunity and ensure a smooth migration to your new version of the NetworX™ product.

For more information about our NetworX™ services please contact us at (678)387-6330 or visit us at www.ehealthpartners.com.
