

Performance Tuning Services

Experienced People
Proven Approaches
Technology Expertise

In a global study of CEO's, only 25% expressed satisfaction with the performance of their IT investments*

Assessment Focus Areas

- Databases
- Servers (Windows and Unix)
- Registries
- Custom and Core Applications
- Interfaces
- Extensions
- Processes
- Services

Deliverables

- System Performance Baseline
- Identify Performance Bottlenecks
- Immediate System Enhancements
- Continued Performance Optimization Plan
- Complete Knowledge Transfer

Industry Comparisons

- Claim Throughputs
- Load Processes
- Server Performance
- Security/External Applications
- Database Performance
- I/O
- Higher-Level Algorithms

Results

- Improve Critical Business Application Performance
- Maximize System Reliability, Integrity and Security
- Boost Employee Productivity
- Prevent Revenue Loss
- Avoid Unnecessary Costs
- Improve Bottom-Line
- Higher-Level Algorithms

In today's fast-paced world, it is more critical than ever to increase productivity and make information readily available to support business decisions. As software packages continue to grow larger and applications become increasingly complex, systems slow and valuable time and efficiencies can be lost. As a result, optimal system performance is essential.

eHealthPartner's technical consulting team possesses the necessary experience and an arsenal of tools to help your organization optimize system performance. We develop custom, performance-based tuning solutions that have been proven to cut transaction times over 200%.

System Performance Assessment

We use a simple yet highly-effective approach that involves methodically reviewing and tuning each component of your system in an organized and well-documented manner. Our Systems Performance Assessment is designed to provide you with a baseline measurement to determine how your system is performing now while quickly identifying any bottlenecks. Following an industry comparative data analysis, we design a customized approach using our proven tools and techniques to deliver high-impact system performance enhancements. Our expert consultants will work closely with your team to ensure full knowledge and skills transfer for continued system improvements.

eHealthPartners' performance tuning solutions enhance user satisfaction and productivity and improve your bottom line by leveraging the full potential of your current systems and avoiding unnecessary expenditures.

For more information about our Performance Tuning Services please contact us at (678) 387-6330 or visit us at www.ehealthpartners.com.
