Increasing healthcare costs and the global economy are creating unprecedented challenges in the healthcare industry. Your organization may be seeing your revenues and earnings fall. You may be also reevaluating your strategic priorities and seeking ways to reduce costs. At the same time, increasing competition, the escalating national healthcare reform debate and new regulatory requirements such as HIPAA 5010 and ICD 10 require your focused attention and investment.

eHealthPartners Strategic Services consultants are leading health insurance industry experts, proven healthcare CIOs and Directors that can help you execute quickly and flawlessly to stay ahead of your competitors. Some of our key services include:

IT Strategy Services

eHealthPartners consultants help you assess how well your IT activities are aligned with your organizations business needs and how IT can be leveraged to reduce costs and achieve competitive advantage. We help you evaluate all options such as stopping or reorganizing current projects, initiating new high-ROI IT initiatives, selecting and implementing new technologies, reorganizing the IT function or outsourcing selected activities.

Program/Project Management

Our experienced team of Program and Project Managers have led projects of all sizes and complexities, including large Fortune-100 heavily matrixed initiatives. Following structured SDLC methodologies, we have a proven track record and can help you deliver your projects on time and budget.

HIPAA 5010

On January 15th, 2009 the Department of Health & Human Services (HHS) released the final rule for the HIPAA 5010 transaction standards. As a trading partner your organization must be ready to exchange 5010 transactions by December, 2010 and must exchange only 5010 transactions by January, 2012. eHealthPartners can assist with assessing your 5010 readiness and implementing a complete compliance solution.

ICD-10

On January 15th, 2009 HHS also released the final rule for ICD-10. The number of diagnosis codes has increased from 17,000 to 155,000. ICD-10 will significantly impact your organization in many areas such as claims, call center, medical management, actuarial and provider contracting. We help you educate your organization, assess your readiness, develop an ICD-10 roadmap and implement remediation activities. We highly recommend that you start your ICD-10 assessment and planning activities as soon as possible to address this sweeping industry compliance mandate.
